Sunbrella fabrics are durable and easy to clean.

Sunbrella superior pigments are added during the production of fade-resistant Sunbrella fibre. The final result is Sunbrella yarn and fabric with colour throughout that won't fade or wash away. Think "carrot."

In ordinary fabrics, dyes are added to the surface of the yarn or fabric. The colour only penetrates the outer layer and washes out or fades away over time. Think "radish."

Protection from the elements. And more.

The skin Cancer Foundation recommends Sunbrella as an aid in the prevention of sun-induced damage to the skin. Please use shading products featuring Sunbrella as a part of your complete sun protection regimen, including regular use of sunscreen.

* Does not apply to styles of Sunbrella that are designed for transparency, such as Sunbrella sheers.

Sunbrella fabrics are GREENGUARD certified for indoor air quality.

Sunbrella fabrics are GREENGUARD Institute's Children and Schools standard as contributing to healthy indoor air by being a very low emitting interior product.

Care and cleaning.

One of the best ways to keep Sunbrella brand fabrics looking good and to delay deep or vigorous cleaning is to properly maintain the fabric. This can be accomplished by simply brushing off dirt before it becomes imbedded in the fabrics, wiping up spills as soon as they occur or spot cleaning soon after stains occur.

Sunbrella Asia Pacific warranties.

These limited warranties protect the original purchaser should Sunbrella marine fabric become unserviceable due to colours or strength loss from normal usage and exposure conditions, including sunlight, mildew and atmospheric chemicals.
